

Step 1: Connect the DVR to your Router

Step 2: Login to DVR, go to main menu, info, version

First, please make sure that the DVR is connected to our server (Similar like below)

(if it doesn't shows "connected", please go back to main menu, system, network. Please make

sure that the DHCP is enabled)

Nat statusConnectedNat status code2:220.231.192.70

After that, copy down the serial number

It must have 16 digits

Step 3: connect with CMS software

Download and Install the CMS software from the link below

http://www.sikkercctv.com/files/CMS.zip

Start the program and it will ask username password. Just leave it username: super and

no password and click Login.

On right hand side, click system and select device manager

Click add area, put any name in zone list (example: sikker) and click ok

Then, you have to select the zone (see picture below) and click add device.

E	dit					×

	Zone	sikker				
	Vendor	H264DVR		•		
			ОК		cel	

- a. Device name: Fill out any name you want
- b. Login Type: select Cloud
- c. Serial ID: enter the DVR 16 digit serial number
- d. User Name: admin
- e. Password: Default is no password, just leave it blank. If you set the

password in the DVR, you have to fill out the DVR admin password. And

click ok.

Device				Monitor		Time

You will see the device you just add on left hand side. Double click it and you will see cam name right under it. If you right click on the device name, you can select connect all video main stream.

Step 4: Connect by Internet Explorer

Internet explorer configuration

- Open the Internet Explorer browser (must be 6.0 or higher).
- Go to Tools, Internet Options :

Yahoo! - Windows Inter	
File Edit View Favorites Norton Norton Safe Se Windows Live	Tools Help Delete Browsing History Cards & Log-ins + Pop-up Blocker Phishing Filter New Profile Mail Photos Calendar MSN Share R + E

	Flickr Personals Search Sames

- Go to Security
- Uncheck "enable Protected Mode" (I.E. 7 or 6 don't have this section)
- Then, go to "Custom Level"

Ensure these security settings are ENABLE or PROMPT:

- Enable: Display video Animation on a webpage that does not use external media player
- Prompt: Download unsigned ActiveX Control
- Prompt: Initialize and script ActiveX controls not marked as safe for scripting
